

**Job Application for Consultant, MicroServices Developer/Analyst**

July 26, 2020

Dear Hiring Manager,

More than five years ago, I started my career as a freelancer building complex websites using different open source CMSes. While studying Computer Security at York University, I found my passion for software architecture and computer security details. Thus, I have focused on developing and architecting software, specifically with Microservices architecture and RESTful APIs. Last year, I co-founded Tread2Go, an automotive service company and managed to develop a highly available and scalable ERP and a PWA. My team members will continue with the project. Therefore, I am looking for a full-time position to transition from my current role and further strengthen my career.

From the beginning of my career, I have always been working directly with key internal stakeholders. At Tread2Go, I saw myself fully responsible for the onsite customer support and 24/7 technical support. Architecting secure software and consulting the best solutions to your customers require a combination of software development skills, computer security knowledge and strong interpersonal expertise. Thus, I think I can be a good fit for the **Consultant, MicroServices Developer/Analyst** role in the Asset Factory team at **Deloitte**.

**Deloitte** software team has created novel software such as InsurCloud and Guidewire. To develop, maintain and scale such tools, the team must have smart, humble, hardworking, and collaborative team members. Mr. Mashruf Chowdhury and Ms. Marmara El Masri kindly introduced **Deloitte's** culture to me, and I think I match this culture.

I am looking to work with a diverse group of talented professionals to architect, design and develop software that can help make tomorrow better for your customers and my team members while improving my skills and growing in my career. Please review my resume since I believe that my motivation, commitment, and current skills will allow me to fit into your work environment and start supporting **Deloitte**. I look forward to meeting with you and other members of the Asset Factory team to discuss my suitability for this position further. I can be contacted at (+1) 647-964-1375.

Sincerely,

**Ali Niaki**
